## La Serratura

Da elemento funzionale a oggetto di **decorazione** e **valorizzazione** della porta

Ancora oggi la serratura è spesso concepita come puro elemento funzionale, elemento il più possibile nascosto, e utilizzato per il solo scopo di garantire protezione e sicurezza, al più privacy.

L'idea di renderla "oggetto d'arredo", con una qualità ineccepibile, è la nostra filosofia. Questo grazie all'adozione di una placca non più anonima, destinata a tutte le porte, a tutte le maniglie senza distinzione di foggia, stile e finitura, ma dotata di un proprio design che rende la serratura "parte integrante" del corredo di ogni porta: maniglia, cerniere, fermaporta ecc.

Le piastre delle serrature della serie *Stilé* sono ottenute mediante forgiatura a caldo dell'ottone e realizzate seguendo canoni stilistici precisi che le rendono accoppiabili a maniglie appartenenti ai periodi del **Manierismo** (Italia 1530 – 1580), del **Primo Impero** (Francia 1805 – 1820) e a qualche esempio di maniglie Stile '900. La possibilità inoltre di ottenere la placca della serratura in finiture coordinate alle maniglie evidenzia, insieme agli elementi decorativi, l'importanza della funzione estetica.

## The Lock

From a functional element to an object of **decoration** and **enhancement** for the door

Even today, the lock is often thought of as a purely functional element, remaining as hidden as possible, and used for the sole purpose of ensuring protection, security, and privacy.

The idea of making it a "piece of furniture", with the highest standards, is our philosophy. This is done by adopting a plate no longer anonymous for all doors, handles all without distinction of style, style and finish, but with its own design that makes the lock an integral part of each door handle, hinge, door stop etc..

The plates from our series of locks *Stilé* are produced by forging hot brass. They make clear the following stylistic canons similar to the handles from the periods of Mannerism (Italy 1530 - 1580), the First Empire (France from 1805 to 1820) and some examples of 'Style' handles 900. The possibility of getting the plate of the lock in matching finishes highlights, together with decorative elements, the importance of the aesthetic function.
